ADDIT: a webnote in IMDI search (2)

A webnote is found and opened:

The screenshot displays the IMDI Browser interface in Mozilla Firefox. The browser window title is "IMDI Browser - Mozilla Firefox". The address bar shows the URL "http://lux15.mpi.nl/ds/imdi_browser/". The main content area is titled "Advanced search" and shows "within 1 selected corpus: Demo [35 sessions]". A search filter is set to "p*". The search results section shows "5 matches within 35 selected" and lists several entries. One entry is highlighted, and a pop-up window titled "http://lux15.mpi.nl - ADDIT - Mozilla Firefox" is open over it. The pop-up window displays the following information:

- ADDIT User: Alex
- Found 1 webnote with a reference to 'MPI307540#':
- Webnote by Alex on Jun 13, 2007 12:33 PM
- Resource URI Relation Object URI
- [Ref 1](#)
- Comment: Peter explaining the way to Kleve
- Buttons: Edit, Delete, Add webnote, Close
- Status: Terminé

ADDIT: a webnote in Lexus

A webnote on a data category in Lexus:

The screenshot shows a Mozilla Firefox browser window with the URL <http://lux16.mpi.nl>. The page title is "Lexus LexicalEntry" and the user is logged in as "gaby cabitz". The main content area shows the definition of "giant moray" in English. A smaller window in the foreground shows an ADDIT webnote with a comment in German.

Definition (E): giant moray

Description

This file was generated from an IMDI 1.9 file and transformed to IMDI 3.0. The substructure of Genre is replaced by two elements named "Genre" and "SubGenre". The original content of Genre substructure was: Interactional = 'conversation', Discursive = 'explanation', Performance = 'Unspecified'. These values have been added as Keys to the Content information.

Description

Peter explains how to come from Nijmegen to Kieve by car, such that Kita would be able to get there.

ADDIT: webnotes and relations

- Click on MyWebnotes in a webnote
- An overview is shown

A relation between IMDI session data and a picture:

The screenshot shows a Mozilla Firefox browser window displaying the ADDIT webnotes table. The table has columns for Date, Resource URI, Relation Type, Object URI, Comment, and Visibility. The first four rows are highlighted in yellow. The first row has a date of 6/13/07 11:49 AM, a Resource URI of Ref_1, and a Comment of 'A first test note with a comment'. The second row has a date of 6/13/07 12:13 PM, a Resource URI of Ref_1, and a Comment of 'The description how to get to Kleve'. The third row has a date of 6/13/07 12:33 PM, a Resource URI of Ref_1, and a Comment of 'Peter explaining the way to Kleve'. The fourth row has a date of 6/13/07 1:18 PM, a Resource URI of Ref_1, a Relation Type of 'is same as', an Object URI of Ref_1, and a Comment of 'Actor of Session identified by a picture on the...'. Red boxes highlight the 'Ref_1' cells in the first and fourth rows, and the 'is same as' cell in the fourth row. Red arrows point from these boxes to a separate window showing the IMDI session data for 'Kleve-route - route description to Kleve [IMDI 3.0]'. In this window, the 'Actors' section is expanded, and 'Actor Peter' is highlighted with a red box. Another red arrow points from the 'Actor Peter' box to a small window showing a picture of a man with glasses and a mustache, identified as '10532.gif (lr)'.
